

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, the researcher presents conclusions and suggestions. After analyzing Despicable Me 3 movies and knowing the many moral values in this movie the researchers make conclusions and suggestions based on the data analysis in the previous chapter.

A. Conclusion

In this research, researchers found four moral values in Despicable Me 3 movies. Of the four moral values, the most commonly encountered is the Courage moral value in the Brave category. The difference between the two is not far and Honesty. Courage is someone who has the choice to refuse or not to be involved in a dangerous situation, but he still chooses to act because of attitudes and actions that affect his courage. Meanwhile, the Brave character which is included in the Courage category is an innate trait of someone who can handle anything dangerous and when dealing with anyone. This trait usually acts without thinking about the risks, because it can be referred to as outside the control of thought.

Then there is the moral value of honesty which is the second dominance after the character of courage. In this moral honesty value in the peace-ability category which shows a peace between the characters, the characters in Despicable Me 3 provide an example that one must be able to make peace with the situation, creating a calm and serene atmosphere. Likewise, when you meet other people, you don't always get angry easily, stay calm and relaxed when you face differences, whether from opinions or the presence of someone you just met. In this moral value Peace-ability teaches to be patient so as not to cause conflict between others. Peace is not a gift from someone or the result of someone else, but is established because of the process of training and habituation of the mind so that it can be flexible to face the various possibilities of life. Flexibility of mind that allows a person to easily adapt in various conditions so that self-control appears.

B. Suggestion

In connection with the conclusions that have been presented. The researcher would like to give some suggestions for English teachers, students, future researchers, readers or literary connoisseurs, especially in the film world. First, for English teachers, this movie can be used as a good learning medium for teachers to teach English. On the other hand, teachers can insert positive values for students according to the moral values in this movie and their categorization.

Teachers can also learn through the values contained in this movie. secondly, for students, this movie is a good recommendation for learning English to be studied and imitated by moral values in everyday life. Students can take the positive values that have been shown in this movie.

Courage, Honesty, Generous, Loyalty are positive moral values that can be used as examples by students. These moral values will make students realize what is at the core of learning while being a student until graduation and the surrounding environment. Third, for future researchers, researchers suggest other researchers to be able to conduct research related to techniques that are more in-depth and in more detail so that they can be better and also useful for other readers. The rest is positive criticism which is very much needed to make further research better than before.
