

## **CHAPTER V**

### **CONCLUSION AND SUGGESTION**

This chapter presented the conclusion and suggestion, The conclusion was formulated from research question and suggestion provided some ideas to English teachers and further researcher related to teacher in learning process.

#### **A. Conclusion**

Based on the findings of the research, the research would make conclusion by showing the result of the observation and interview. Canva focuses on graphic design, but currently Canva also provides useful educational features for teaching and learning activities in the classroom. Canva can be a good solution for teachers as a teaching and learning media at MTs N 1 Kota Blitar.

Increase student motivation. With Canva, students can experience greater enjoy and engagement in learning. They can create attractive visual designs to present their writing results, which can increase their motivation to write better. Increase student creativity. Canva offers a wide variety of templates, fonts, images and other design elements that students can use to create a visually appealing look for their writing. This helps develop students' creativity in stringing words and communicating their ideas in a unique way. Makes the student's easy to find new ideas. Canva has an extensive image search feature, so students can easily find images that are relevant to the topic they are writing about. This can help them get inspiration and new ideas in writing.

Canva media can improve the student's writing skills of MTs N 1 Kota Blitar. In its application has advantages and disadvantages. In overcoming this

deficiency, good planning and strategies are needed in the use of Canva as a teaching and learning medium. By taking advantage of Canva strengths and paying attention to its weaknesses, teachers can create a more interesting and interactive learning experience for students.

## **B. Suggestion**

Based on the conclusion above, the researcher recommended some suggestion as follows as:

### 1. For teachers

From this study, teachers are advised to use technology, especially the Canva application which has been implemented at MTs N 1 Kota Blitar. because the current learning media needs collaboration between lessons and technology with the aim that students don't feel bored in learning. then can help the teacher to display the material. Types of technology, both websites and non-websites, have made it easier for teachers to design materials needed by students, besides that all information can also be accessed using technology. However, it is important to remember that the use of technology in learning must be supported by proper planning and supervision. Teachers need to ensure that the use of technology is not only aimed at increasing visual appeal, but also learning effectiveness and achieving learning goals. In addition, aspects of equal access to technology also need to be considered, so that all students have the same opportunity to utilize technology in learning.

## 2. For Students

Technology is an effective tool for students because students can study anywhere using technology, a lot of information can be accessed easily by students. So that learning knows no boundaries of space and time. By using Canva, students can create interesting and creative visual works. In this regard, Canva and other technologies are opening the door to more flexible learning, allowing students to learn in a more personal and independent way. They can explore new idea, hone their creative skill and share their work with fellow students or teachers on online platforms. In addition, attention should also be paid to ensuring equal access to technology so that all students have equal opportunities to learn and work with these tools.

## 3. For further researcher

With this research, it provides an opportunity for future researchers to conduct research on information and communication technology that has been used by teachers in the teaching and learning process. there are many other aspects that can be researched in the context of the use of ICT in learning. It is hoped that further research can provide deeper insight and understanding of the impacts, challenges and benefits of using ICT by teachers in facilitating an effective and innovative teaching and learning process.
